Who We Are:

The Charles F. and Joanne Knight Alzheimer Disease Research Center (Knight ADRC) supports researchers, our participants, and the lay public in their pursuit of answers that will lead to improved diagnosis and care

for persons with Alzheimer disease (AD). Our Center is committed to the long-term goal of finding a way to effectively treat and prevent AD.

For patients and families experiencing the changes of AD or a related dementia, it can be challenging to know how to find resources and access support. The Knight ADRC is proud to offer services through our research center and foster strong partnerships with our partner organizations who specialize in supporting patients and care partners with a dementia diagnosis. Whether you have a formal diagnosis, are concerned about new changes to your thinking and memory, or are a person providing care for a loved one, we can support you on this journey.

Welcome Message

The Knight Alzheimer Disease Research Center (Knight ADRC) welcomes you to the 20th Norman R. Seay Lecture!

The inaugural Seay Lecture in 2006 was created to honor Mr. Norman R. Seay, an esteemed civil rights leader in St. Louis and the initial Chair of the Knight ADRC's African American Advisory Board (AAAB). At the time, we did not envision how important the Lecture would become for our Center. The Seay Lecture annually brings accomplished African American faculty in the fields of brain health and dementia to Saint Louis to address both academic audiences and the St. Louis community regarding the need to ensure that research cohorts represent all members of the population. Thanks to Mr. Seay's vision and the work of the AAAB, the Knight ADRC strives to be welcoming to all people.

John C. Morris and David M. Holtzman

John C. Morris, MD and David M. Holtzman, MD

Directors, Knight Alzheimer Disease Research Center

Clinical Research Specialist
Outreach Recruitment Engagement Core and Health Disparities Engagement
Core at Washington University

CALL TO ACTION

Dorothy P. McDowell, MA

CLOSING REMARKS

John C. Morris, MD

Honoring the Legacy of Norman R. Seay

A Life of Purpose and Principle

A lifelong advocate for justice, Norman R. Seay (1932–2019) devoted his life to the pursuit of equality, dignity, and opportunity for all. Born and raised in St. Louis, Mr. Seay graduated from Vashon High School in 1953, where he helped found the St. Louis chapter of the Committee on Racial Equality (CORE)—an organization that challenged segregation through nonviolent protest.

After earning a Bachelor of Arts in Elementary Education from Stowe Teachers College (now Harris-Stowe State University) and serving in the U.S. Army, Mr. Seay began his teaching career at Pestalozzi Elementary and later Sumner High School, shaping young minds while continuing his civil rights activism. His dual callings—education and equality—would define his life's work.

National Service and Movement Leadership

In 1974, Mr. Seay brought his vision for inclusion to the national stage, joining the U.S. Public Health Service in Washington, D.C. During his decade of service, he helped organize the first observance of Dr. Martin Luther King Jr. Day and co-founded Blacks in Government (BIG), a national nonprofit dedicated to advancing equity in public service. Mr. Seay served as its inaugural chairman, guiding its early formation and national expansion.

Return to St. Louis and Leadership in Education

Mr. Seay returned to St. Louis in 1984 to care for his mother, who was experiencing early signs of Alzheimer disease. That personal journey deepened his understanding of health inequities affecting African American families. Professionally, he continued to advance opportunity as Director of the Office of Equal Opportunity at the University of Missouri–St. Louis (UMSL), where he led for more than 15 years. His steadfast leadership transformed institutional policy and inspired generations of students and colleagues.

Service, Health Equity, and the Knight ADRC

Motivated by his mother's Alzheimer disease diagnosis, Mr. Seay was a driving force behind community engagement in dementia research. As the Inaugural Chair and later Chair Emeritus of the African American Advisory Board (AAAB) at the Knight Alzheimer Disease Research Center (Knight ADRC) at Washington University School of Medicine, he built trust between the community and researchers.

Under his leadership, the AAAB became a national model for authentic, community-driven collaboration—ensuring African American voices are represented in Alzheimer research, education, and care. Mr. Seay's compassion, wisdom, and unwavering advocacy remain the foundation of the Knight ADRC's equity mission today.

A Legacy That Lives On

Mr. Seay's extraordinary life of service earned numerous honors. He was featured in the Missouri History Museum's 250/250 Exhibit, received the Rosa L. Parks Award from Washington University in 2015, and appeared in #1 in Civil Rights: The African American Freedom Struggle in St. Louis (2017–2018).

He also served as President and Chairman of the Board of the Federation of Block Units, volunteered with the Urban League of Metropolitan St. Louis, and remained a mentor and moral compass for countless activists, educators, and neighbors.

Mr. Seay passed away on September 17, 2019, at the age of 87. His courage and conviction continue to inspire all who believe in equality and the power of service.

The Norman R. Seay Lecture

In tribute to his lifetime of leadership, the Knight ADRC established the Norman R. Seay Lecture—an annual program celebrating Mr. Seay's vision of partnership between science and community. Each year, the lecture convenes researchers, families, advocates, and policymakers to advance Alzheimer awareness, health equity, and community empowerment.

Celebrating 25 Years of the African American Advisory Board

Since its founding in August 2000, the African American Advisory Board (AAAB) at the Knight Alzheimer Disease Research Center (Knight ADRC) has stood as a vital bridge between science and community, thoughtfully guiding outreach, recruitment, and communication to foster lasting participation of Black St. Louis families in memory and aging research.

As we mark a quarter-century of dedicated service, we pause to reflect on the board's significance, its ongoing mission, and to honor those whose leadership and vision continue to inspire.

Mission & Impact

The AAAB was established to counsel the Knight ADRC research team on culturally responsive strategies to engage African American communities in long-term research participation. Its goals include:

- Acting as ambassadors and liaisons between Knight ADRC investigators and the St. Louis African American community
- Advising on outreach, recruitment, retention, and educational programs to ensure relevance, sensitivity, and trust
- Reviewing all materials (print, video, outreach content) to promote clear, consistent, culturally appropriate messaging

Over 25 years, the Board's guidance has helped the Knight ADRC strengthen trust, broaden community enrollment in studies, and improve communication strategies in historically underrepresented communities. Its presence affirms that research cannot flourish without voices from the very communities it aims to serve.

2025 Board Membership

Pastor Douglass Petty, PhD (Chair)
Rev. C. Jessel Strong (Vice Chair)
Alexandre Carter, MD, PhD
Karen Collins, EdD
Stacy Edwards
Beverley Foster
Ronald Gregory, EdD
Joyce Hamilton

Barbara Herschbach
Richard King
Collins Lewis, MD
Emily Pitts
Arlene Moore Ross
Jesse Swanigan
Bernice Thompson
Sidney White

Myrtis E. Spencer, Knight ADRC AAAB Coordinator

In Memoriam

As we commemorate the 25th anniversary, we pause to remember board members who have passed away. Their dedication and wisdom continue to shape the work and mission of the AAAB and Knight ADRC long after their tenure:

David Black
Martin Matthews
Mary Attyberry Polk
Anne-Marie Prophete

Norman R. Seay
Sallie Simmons
Mary Thomas
Ida Goodwin Woolfolk

A Quarter-Century Forward

Over these 25 years, the AAAB has become more than advisory support—it has become a symbol of accountability, partnership, and mutual respect. Its enduring presence reminds us that scientific progress must walk hand in hand with community trust and voice.

As we gather for the 2025 Norman R. Seay Lecture, we celebrate not only the years behind us, but the promise ahead. May we recommit to listening, bridging, and including — honoring the legacy of those who served before us.

2025 Norman R. Seay Lecture Speakers

MODERATOR

John C. Morris, MD

John C. Morris, MD, is the Harvey A. and Dorismae Hacker Friedman Distinguished Professor of Neurology; Professor of Pathology and Immunology; Professor of Physical Therapy; Professor of Occupational Therapy; and Co-Director of the Charles F. and Joanne Knight Alzheimer's Disease Research Center at Washington University School of Medicine. Dr. Morris' research interests include healthy aging and Alzheimer dementia, antecedent biomarkers for Alzheimer disease, and trials of investigational drugs for the treatment of Alzheimer

dementia. Dr. Morris has authored 4 books and more than 950 published articles (current h-index 196). Dr. Morris is a member of several professional societies and serves on numerous scientific and community advisory boards. He has received many honors and awards, including the MetLife Award for Medical Research in Alzheimer's Disease (2004); the Lifetime Achievement Award from the Alzheimer's Association (2004); the Potamkin Prize for Research in Pick's, Alzheimer's, and Related Dementias (2005); and in 2009 he was the T.S. Srinivasan Orator in Chennai, India. He received the Carl and Gerty Cori Faculty Achievement Award, Washington University (2010) and in 2013, he received the 2013 Peter H. Raven Lifetime Achievement Award from the Academy of Science of St. Louis, the Washington University School of Medicine Second Century Award, and was the 2013 Medical & Scientific Honoree from the Alzheimer's Association. He is ranked in the top 1% of investigators in the field of Neuroscience and Behavior by Essential Science Indicators database.

WELCOME

Douglas Petty, PhD

Dr. Douglass Petty has over thirty years of experience as an organizational and church consultant, educator, community organizer, executive and life coach, and motivational speaker. He currently serves as Chair of the African American Advisory Board of the Knight Alzheimer Disease Research Center (Knight ADRC) and as a member of the SSM Health System Board of Directors. He is also the Division Operating Director of The Urban League of Metropolitan St. Louis.

Dr. Petty is the lead principal of Christian Coaching & Resource Consultants and an active member of several professional organizations, including the American Counseling Association, American Association of Christian Counselors, American Psychological Association, American Academy of Experts in Traumatic Stress, and the International Christian Coaching Association. An ordained minister for more than forty years, Dr. Petty serves as transitional pastor of Cote Brillante Presbyterian Church and founding pastor of Fresh Start Bible Church in St. Louis, dedicated to making disciples, developing servant leaders, and partnering with ministries that model integrity. He is the author of Pastoral Reflections of a God Honoring Church, Petty Quotes on Life and Leadership, Serve Well, and How to Say It Now.

Dr. Petty holds an A.A. in Physical Education, a B.A. and M.A. in Psychology, and a Ph.D. in Christian Counseling. He is married and has one adult son.

VIDEO REFLECTIONS - PAST SEAY LECTURERS

Consuelo H. Wilkins, MD, MSCI

Consuelo H. Wilkins, MD, MSCI, is an internationally recognized physician-scientist and a leader in integrating social, cultural, and environmental factors into clinical and translational research. She is a Professor of Medicine in the Division of Geriatric Medicine at Vanderbilt University Medical Center (VUMC) and has revolutionized the academic and clinical research landscape by embedding participant and community engagement into every aspect of biomedical discovery.

A pioneer in her field, Dr. Wilkins has reshaped clinical research design to prioritize involvement of people most impacted by poor health.

Before joining VUMC in 2012, Dr. Wilkins was an Associate Professor in the Department of Medicine, Division of Geriatrics, at Washington University School of Medicine in St. Louis, with secondary appointments in Psychiatry and Surgery (Public Health Sciences). She was the founding director of the Center for Community Health and Partnerships within the Institute for Public Health, co-director of the Center for Community-Engaged Research in the Clinical and Translational Science Awards Program, and director of “Our Community, Our Health,” a collaborative initiative with St. Louis University designed to disseminate culturally relevant health information and foster community-academic partnerships. Dr. Wilkins’ transformative contributions to clinical and translational research continue to advance the field, ensuring that science is both rigorous and impactful for all people.

Robert W. Turner, II, PhD

Robert W. Turner, II, PhD, is an Associate Professor in the Department of Population Health Sciences at Duke University, with appointments in the Duke Aging Center and the Duke Sports Sciences Institute. He also serves as a Faculty Collaborator with the Morey PTSD and TBI Neuroimaging Lab at Duke. Dr. Turner is the Principal Investigator (PI) for a \$6.3 million NINDS-funded R01 grant, “The Contribution of Repetitive Head Impacts and Social Determinants of Health to Alzheimer’s Disease and Related Dementias in Older Adult

Black Men.”

He leads the NIA-funded Black Men’s Dementia Caregiver Study, and is Co-PI for the grant “Black Male Brain Reserve, Resilience & Alzheimer’s Disease: Life Course Perspectives,” and oversees the Men’s Brain Health Initiative (MBHI), which launched the Men’s Brain Health Directory in the summer of 2023.

He earned his Ph.D. in Medical Sociology from the Graduate Center, City University of New York (CUNY). Before entering academia, Dr. Turner attended James Madison University on an athletic scholarship and went on to play professional football in the USFL, CFL, and NFL. He is the author of *Not For Long: The Life and Career of the NFL Athlete* (Oxford University Press) and a content contributor for the LeBron James-produced HBO documentary, *Student Athlete*.

Crystal M. Glover, PhD

Crystal M. Glover, PhD, is an applied social psychologist, mixed methodologist, and Associate Professor with tenure in the Department of Neurology at the University of California, Irvine (UCI) School of Medicine. She leads the Outreach, Recruitment, and Engagement Core at the UCI Alzheimer's Disease Research Center in the UCI Institute for Memory Impairments and Neurological Disorders (UCI MIND) and serves as an Associate Director of the Recruitment, Engagement, and Retention Unit in the Alzheimer's

Clinical Trials Consortium (ACTC).

Dr. Glover has designed and built a program of research focused on addressing challenges related to health and research access and facilitating optimal outcomes in aging. Her program of research consists of two interconnected components that examine: 1) decision making associated with complex, nuanced, and sensitive topics in older age; and 2) protective and risk factors of healthy aging. Her research has led to the design, development, and implementation of engagement approaches, educational materials, and intervention strategies.

Dr. Glover has widely published her peer-reviewed work in several high-impact scientific journals, including *Alzheimer's & Dementia: The Journal of the Alzheimer's Association*, *CHEST*, and *Human Genetics*. She is the inaugural Editor-in-Chief of *Alzheimer's & Dementia: Behavior & Socioeconomics of Aging (BSEA)*, the newest member in the Alzheimer's Association family of scientific journals. She continues to present her research at international and national scientific meetings and belongs to several intercontinental and domestic scientific committees and professional groups. Dr. Glover dedicates her work to service and strategies for optimal aging for all - globally, nationally, and locally.

ROUNDTABLE DISCUSSION

Joyce E. Balls-Berry, PhD, MPE

Dr. Joyce "Joy" Balls-Berry is a nationally recognized expert in community and patient engagement in research. Renowned for fostering meaningful and equitable partnerships, she has collaborated with academic medical centers, community organizations, healthcare systems, and service providers across the United States and internationally.

Dr. Balls-Berry serves as an Associate Professor of Neurology at

Washington University School of Medicine (WashU Med), where she is the inaugural Core Leader for the Health Disparities Engagement Core in the Knight Alzheimer Disease Research Center (Knight ADRC) and the Associate Lead for Community Engagement in the Precision Health Area of the Institute of Clinical and Translational Sciences (ICTS). She was previously an Assistant Professor of Epidemiology at the Mayo Clinic.

Her current research, funded by the National Institute on Aging (NIA), focuses on developing innovative approaches to recruit, enroll, and retain community members in Alzheimer's disease and related dementias (ADRD) research. Since 2023, her registry initiative has successfully enrolled more than 1,000 participants.

Dr. Balls-Berry is also deeply involved in leadership and service, serving as Secretary/Parliamentarian of the Association for Clinical and Translational Science (ACTS) Board of Directors and Chairperson of the Board for Health Literacy Media. Her outstanding contributions have been recognized with honors such as the Dean's Impact Award from WashU Med and the 40 for 40 MLK Servant Leader Award from the Bayer YMCA. Beyond her scholarly work, Dr. Balls-Berry is a passionate advocate for neurodiversity and has shared her personal journey with dyslexia through a widely viewed TEDx Talk.

Dorothy "Dotti" P. McDowell, MA

Dorothy "Dotti" P. McDowell is a Clinical Research Specialist with the Outreach, Recruitment, and Engagement (ORE) Core at the Knight Alzheimer Disease Research Center (Knight ADRC) at WashU Medicine. She also serves within the Health Disparities Engagement (HDE) Core and Balls-Berry Lab, where she advances community-centered strategies to increase participation of African American and other underrepresented groups in Alzheimer disease and related dementia (ADRD) research.

With a professional background in urban planning and health equity, Dotti brings a systems-level perspective to her work, designing and implementing culturally responsive engagement approaches that strengthen trust and collaboration between researchers and the communities they serve. She works across interdisciplinary teams to align outreach, recruitment, and retention strategies across Missouri and Illinois and is deeply committed to building pathways that reflect the diversity of those affected by Alzheimer's disease.

Her work focuses on forging authentic community partnerships, expanding awareness of brain health, and creating opportunities for individuals and families to participate in research and educational initiatives that inform prevention, diagnosis, and care. Dotti is particularly passionate about dismantling barriers to research involvement, from historical mistrust to logistical challenges, and is dedicated to creating meaningful connections that ensure all communities are represented in and benefit from scientific progress.

Through her leadership and collaborative approach, Dotti helps advance the Knight ADRC's mission to promote inclusive research participation and broaden access to innovations that improve brain health and quality of life for individuals, families, and communities.

Prior Seay Lecturers

(Institutional affiliation at the time they presented their lecture)

2006 Jennifer Manly, PhD

Professor of Neuropsychology in Neurology at the Gertrude H. Sergievsky Center and the Taub Institute for Research in Aging and Alzheimer's disease at Columbia University, New York, New York

"Memory and Aging Research in African Americans"

2007 Peggye Dilworth-Anderson, PhD

Professor of Health Policy & Management at the Gillings School of Global Public Health, University of North Carolina- Chapel Hill

"A Designed Pathway for Alzheimer's Intervention in Diverse Cultures"

2008 James S. Jackson, PhD*

Professor of Psychology, Health Behavior and Health Education, School of Public Health, and Director of the Institute for Social Research, at the University of Michigan, Ann Arbor

"Race, Ethnicity and Cultural Influences on Mental Health: A Life Course Framework"

2009 Orien Reid, MSW*

Member of the National Institutes of Health Council of Councils and member of the External Advisory Board for the Institute on Aging at the University of Pennsylvania, Philadelphia

"Take Charge of Your Alzheimer's Disease Risks: Overcome Cultural Myths"

2010 Lisa Barnes, PhD

Associate Professor of Neurological Sciences and Behavioral Sciences, Rush University Medical Center, Chicago, Illinois

"Aging and Alzheimer's Disease in African Americans: The Minority Aging Research Study"

2011 Patrick Griffith, MD

Professor of Clinical Medicine and Chief of the Division of Neurology, Department of Internal Medicine at Morehouse School of Medicine in Atlanta, Georgia

"Are African Americans Part of the Alzheimer's Disease Story?"

2012 Taylor Harden, PhD

Program Director at the National Hartford Centers of Gerontological Nursing Excellence in Washington, D.C.

"Unequal Burden and Unparalleled Opportunities: Minorities in Alzheimer's Disease Research"

2013 Consuelo Wilkins, MD, MCSI

Executive Director of the Meharry-Vanderbilt Alliance, a strategic partnership between Meharry Medical College and Vanderbilt University Medical Center, Nashville, Tennessee

"The Three Keys to Closing the Disparities Gap in Alzheimer's Disease"

2014 Goldie Byrd, PhD

Professor of Biology and Dean of the College of Arts and Sciences at North Carolina A&T State University, Greensboro, North Carolina

"Engaging Community in the Recruitment of African Americans for Genetic Studies in Alzheimer's Disease"

2015 Richard D. King, PhD

Assistant Professor of Neurology, Director-Alzheimer's Image Analysis Laboratory, University of Utah-Salt Lake City

"Exploring Brain Complexity and Other Imaging Insights into Alzheimer Disease"

2016 Donna Masterman, MD, MS

Associate Group Medical Director at Genentech, Inc., a member of the Roche Group in South San Francisco, California

"Advances in Biotechnology: The Benefits for Underserved Populations"

2017 Monique Williams, MD, MSCI

Medical Director-VITAS Healthcare-Saint Louis

"Lessons Learned & Future Directions: Addressing Dementia Disparities and Achieving Inclusion in Dementia Research"

2018 Joyce Balls-Berry, PhD, MPE

Assistant Professor of Epidemiology and Senior Associate Consultant at Mayo Clinic College of Medicine and Science, Rochester, Minnesota

"Silent Voices: Increasing Minority Engagement in Alzheimer's Disease"

2018 Carl Hill, PhD, MPH

Director-Office of Special Populations, National Institute on Aging, Bethesda, Maryland

"Diversity in Clinical Trials Recruitment: Intention Omission and the Silence"

2019 Crystal Glover, PhD

Assistant Professor, Division of Behavioral Sciences, Rush Alzheimer's Disease Research Center at Rush University Medical Center, Chicago, Illinois

"Alignment and Activism: Fostering Research Participation Among African Americans Through Resistance, Resilience, and Representation"

Together, We Create Legacy

A smiling man with glasses, wearing a dark suit, white shirt, and a patterned tie, is holding a tablet. The background is a light-colored wall with a framed picture.

**“When we come together,
we create more than
change — we create
legacy.”**

The Norman R. Seay Lecture is more than an annual gathering — it is a celebration of community, courage, and collective action.

It is a reminder that when we come together with purpose, we create more than progress — we create legacy.

May this day inspire you to lift as you climb, to share what you learn, and to continue building a future where every voice is heard, every mind is valued, and every life matters.

Acknowledgments

We extend our heartfelt gratitude to our friend and colleague Matthew Gabel, PhD, Professor in the Department of Political Science at Washington University in St. Louis, for his generous support of the 20th Norman R. Seay Lecture.

We also thank the following organizations for their continued partnership and support of the Seay Lecture and the African American Advisory Board:

- 100 Black Men of Metropolitan St. Louis
- The Links, Incorporated – St. Louis (MO) Chapter

Finally, we are deeply appreciative of our academic partners, community collaborators, and all those joining us in person and virtually. Your engagement sustains the spirit of unity and purpose that defines this lecture and its legacy.
